## What is an iLocker?

iLocker is an innovative combination of flexible workspace storage, best-in-class physical security technology, and the latest connected technology. It provides advanced storage solutions that offer 24/7 manageable access, end-to-end tracking of usage, new more efficient business processes, automation and full management reporting capabilities.

It helps improve accountability, governance and enable connectivity with other smart systems and devices for more flexibility and comfortability. Much more than just a locker, iLocker gives your business:

- Maximize resource utilization
- Improve flexibility and usage
- Greater security and governance
- End-to-end user visibility and management
- 24/7 accessibility with different security options
- Usage reports and analysis

## Where iLocker can help your businesses.

iLocker comes with four key applications, to suit your business needs and future-proof your workplace. It provides four key types of smart locker, which are all customizable to suit your office environment.

Smart Workplace Locker is designed to serve employee for day-to-day temporary storage. With the introduction of agile working and hot-desking, your workforce requires personal, and in some cases, team locker space. Employees can reserve a locker in advance via their mobile device, or on-demand via a touch screen console.

Smart Retail & Fitness Locker facilitates customers by "Scan & Collect" concept. Once the users identify themselves, they can store their personal belongings. The pick-up techniques shall be through either I.D. Card or QR Code upon security policy.

Smart Parcel Locker enables today's mailroom to deal with increasing parcel and secure mail volumes easily, providing a new approach to distribution management. Offering end-to-end accountability, it increases convenience for your employees, and save on time and the workload of your mailroom staff. This solution enhances security and simplifiers productivity chains.

Smart Helmet Locker locates at motorcycle parking lobby in order to store helmets.

# LOCKERS FOR YOUR WORKPLACE

iLocker for smart workplace brings a best-of-breed solution to improve well-being in modern workplace and improve office resource utilization in a common workplace problem. With the popularity of flexible workspace concept, your workforce is increasingly mobile and agile. However, employees still require personal, and in some cases, team locker space. iLocker helps manage this day-to-day, whilst auditing usage, dealing with locker hogging and lost keys all adds to the workload of the facilities team and frustrates the workforce.

iLocker offers both secure temporary and permanent storage, providing your staff with a safe space for their personal belongings at the workplace, whilst at the same time providing greater control of your property portfolio. With the smart locker employees can reserve a locker in advance via their mobile device, or on-demand via a touch screen console.

## Benefits & Features

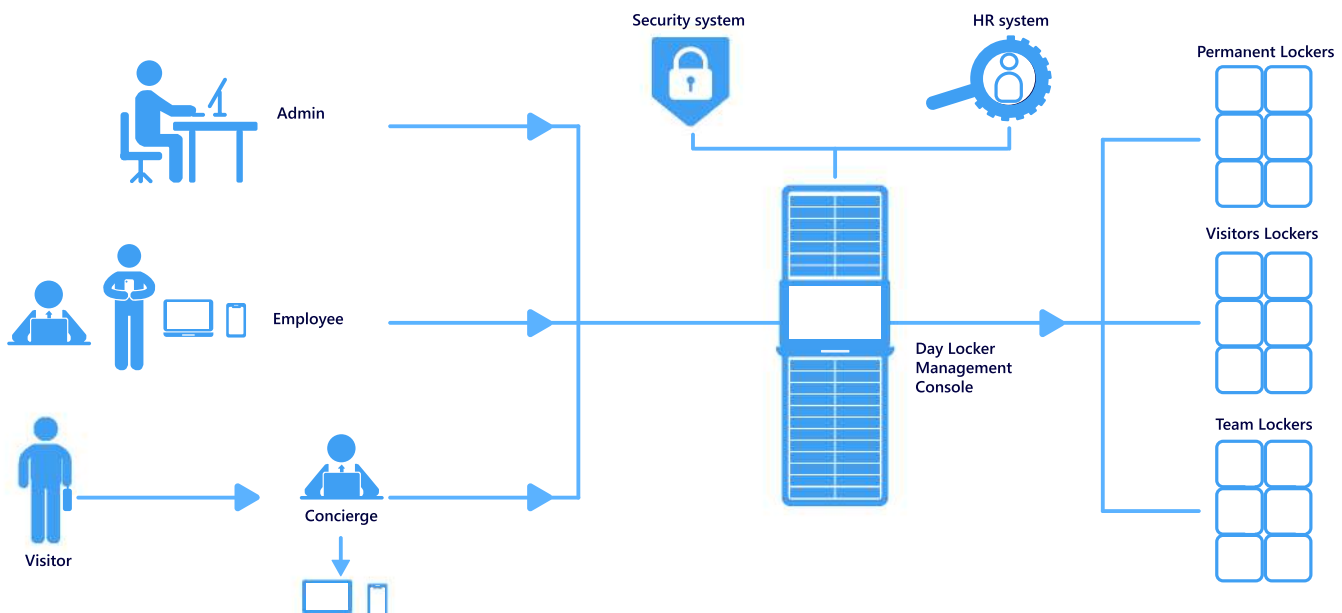

iLocker enables multiple storage locations to be managed from a single online portal and aligned with corporate policy. With a keyless entry system using your facial, QR, or ID card, the locker track who is using what, and for how long. Thanks to our smart sensor and notification features, you will never leave your personal belongings behind.

## Key Benefits:

- Increase staff well-being in modern workplace
- Oversight of your office locker resource
- Online booking facility
- Keyless accessibility
- Worked with other smart workplace solution
- Modular, extendable and customizable

## iLocker for Personal

## iLocker's Technology

iLocker provides best-in-class locking technology and workspace management, offering greater security for your employees and ease of facility management. Management of units is centralized at a Locker Bank, which can only be accessed via facial, QR, ID card, or NFC. This control interfaces offer full accountability and security for all staff in modern workplace.

## Built to meet your needs:

Whether you are a large enterprise, manufacturing business, university, school, retail, fitness center, or hospital, our range of locker configures will help you optimize your property holdings and increase accountability. iLocker comes in a range of styles to meet your organization needs, whether it is stand-alone or networked and integrated.

## Modular, extendable, and customizable

The modular column design of the lockers enables them to flex according to your different layout requirements. The size of the lockers is also customizable to accommodate different staff needs in your workplace.
